Mr. E. Perry Kupferman
Supervising Life Actuary
California Dept of Insurance
Suite 14514
300 South Spring Street South Tower
Los Angeles, CA

Dear Mr. Kupferman:

Attached is a resubmission of our previous Individual health premium rate filing CA-2010- 00354. This submission corrects a simple calculation error concerning the premium development in the lifetime loss ratio demonstration. The requested premium rate increase of 18.7% is unchanged from the original rate filing and meets the loss ratio requirements under California law.

Our requested rate increases are necessary considering the financial losses we have sustained on these policies. Over the period from Jan. 2006 through Dec. 2009, we incurred an operating loss of approximately $6 million before taxes and project additional losses of $7 million before taxes for 2010.

As evidenced above, current experience has continued to deteriorate. It is important to note that we have voluntarily delayed these increases from our original July effective date and capped increases for individual members. These considerations would justify a significantly higher increase, however we believe the attached rate filing will improve the sustainability of these policies.

Implementing our requested rates will help ensure the long term viability of our Individual products in California. The rates contained in this filing will also help members achieve more predictable health insurance premiums. Our objective is to implement these rates with a September effective date.

We stand ready to answer any questions that the Department or Axene Health Partners may have regarding this filing in order to allow timely implementation of these rates.

Sincerely,

Garth

Experience under these policy forms is limited and not credible as they were just recently introduced. Experience under form GR-11741 which contains similar benefits was used as the basis for the request. Upon approval from the State of California, the rates and medical rate up will become effective for September 1, 2010 renewal dates and later.

Area Changes

No area changes are being made in conjunction with this filing. A complete description of rating area definitions is included in the attached Exhibit A.

Proposed Effective Date

We are proposing an effective date of September 1, 2010.

Quarterly Trend

We will apply a quarterly trend factor for renewal business according to the table below:

Dates	Trend Factor
10/01/10 – 12/31/10	1.035
01/01/11 – 03/31/11	1.071
04/01/11 – 06/30/11	1.109

Note that an individual's rate will be increased on policy anniversary.

Premium Rates for other Underwriting Levels

We will charge a higher rate for members who are less healthy than our standard risk. We will issue policies at eleven different underwriting levels. The lowest underwriting level will have no rate up adjustment. The additional ten underwriting levels will have rate up factors ranging from 10% to 100% in 10% increments. The final rate for the underwritten policy will be determined as the standard rate multiplied by (1 + rate-up-factor). The underwriting classification will be assigned at the time the policy is issued, and will not be changed by Aetna if a member's health deteriorates after purchasing coverage. However, if the member applies to change their benefits, we will consider the member's medical condition at the time of the change request. If their health status at the time of the request warrants a different underwriting classification, then the member can accept the new coverage at the different underwriting classification or remain in their current coverage at their current underwriting classification.
