PPACA: Non-Grandfathered Immed Mkt Reforms, Grandfathered Immed Mkt Reforms

Filing Description:

We enclose, for your Department's filing, a rate filing for our existing business on the above referenced approved form. The proposed effective date is January 1, 2011.

The purpose of this filing submission is to add the new requirements that will become effective on January 1, 2011, as the result of the Federal Patient Protection and Access to Care Act (PPACA), and to eliminate gender as a factor in calculating health insurance rates, consistent with new mandatory California requirements.

PPACA related changes include:

• Elimination of the Preexisting Conditions Exclusion for Covered Persons less than 19 years of age.
• Elimination of Annual and Lifetime Dollar Limits on “Essential Services”, as defined by PPACA.
• Elimination of cost-sharing for specified Preventive Services.
• Extension of Dependent Coverage for Children up to Age 26 without dependency requirements such as being a full-time student, unmarried or solely dependent upon the parents for support.
• Requires plans that cover emergency services to provide such coverage without the need for prior authorization, regardless of the participating status of the provider, and at the in-network cost-sharing level.

Concerning gender, previously, a person’s gender was one of several factors used to determine how much they would pay for a health plan (other factors include age, where they live, and health status). The elimination of gender as a rating factor will impact the rates that men and women in different age brackets will pay.

Our claims experience in California generally shows that young women use more health care services than men (the opposite is generally true beginning around ages 50-55). For younger individuals, the elimination of gender rating means that men would subsidize women (resulting in potential rate increases for young men and potential rate decreases for young women). For older individuals, women would subsidize men (resulting in potential rate increases for older women and potential rate decreases for older men).

We have also revised the enclosed Lifetime Loss Ratio projections to incorporate changes recommended in the Axene Health Partners report dated September 17, 2010.

Supporting documentation for this filing and the above noted changes includes the following:

• Document Submission Form
• Actuarial Memorandum and Certification
• Exhibit A - Demographic Factors
• Exhibit B - Rating Area Definitions and Factors
• Exhibit C - Demonstration of the Anticipated Lifetime Loss Ratio
• Rate Tables for each of the benefit plans

Subject: Aetna Life Insurance Company, NAIC No. 00160054
Form GR-11741-HCRng 01, GR-11741-HCRg 01, GR-11741 (03-09), GR-11741-SOC 02/10, GR-11741-LME (03-09), GR-11741-LME SOC (03-09), et al.
Aetna Tracking: CA-2010-09

Dear Sir/Madam:

We enclose, for your Department's filing, a rate filing for our existing business on the above referenced approved form. The proposed effective date is January 1, 2011.

The purpose of this filing submission is to add the new requirements that will become effective on January 1, 2011, as the result of the Federal Patient Protection and Access to Care Act (PPACA), and to eliminate gender as a factor in calculating health insurance rates, consistent with new mandatory California requirements.

PPACA related changes include:

- Elimination of the Preexisting Conditions Exclusion for Covered Persons less than 19 years of age.
- Elimination of Annual and Lifetime Dollar Limits on “Essential Services”, as defined by PPACA.
- Elimination of cost-sharing for specified Preventive Services.
- Extension of Dependent Coverage for Children up to Age 26 without dependency requirements such as being a full-time student, unmarried or solely dependent upon the parents for support.
- Requires plans that cover emergency services to provide such coverage without the need for prior authorization, regardless of the participating status of the provider, and at the in-network cost-sharing level.

Concerning gender, previously, a person’s gender was one of several factors used to determine how much they would pay for a health plan (other factors include age, where they live, and health status). The elimination of gender as a rating factor will impact the rates that men and women in different age brackets will pay.

Our claims experience in California generally shows that young women use more health care services than men (the opposite is generally true beginning around ages 50-55). For younger individuals, the elimination of gender rating means that men would subsidize women (resulting in potential rate increases for young men and potential rate decreases for young women). For older individuals, women would subsidize men (resulting in potential rate increases for older women and potential rate decreases for older men).

We have also revised the enclosed Lifetime Loss Ratio projections to incorporate changes recommended in the Axene Health Partners report dated September 17, 2010.

Supporting documentation for this filing and the above noted changes includes the following:

- Document Submission Form
- Actuarial Memorandum and Certification
- Exhibit A - Demographic Factors
- Exhibit B - Rating Area Definitions and Factors
- Exhibit C - Lifetime Loss Ratio Projections
- Rate Tables for each of the benefit plans

We trust that you will find everything in order. If you have any questions regarding this filing, please do not hesitate to contact me at the address or telephone number shown above.

Very truly yours,

James T. Lescoe

James T. Lescoe

AETNA LIFE INSURANCE COMPANY

Actuarial Memorandum
Aetna Tracking CA-2010-09
Form GR-11741-HCRng 01, GR-11741-HCRg 01, GR-11741 (03-09), GR-11741-SOC 02/10, GR-11741-LME (03-09), GR-11741-LME SOC (03-09), et al.
(Comprehensive Medical Expense PPO Policy and Limited Medical Expense PPO Policy)

Purpose, Scope and Effective Date

The purpose of this filing is to file proposed changes to our currently filed premium rates for purposes of:

1. compliance with Federal Health Care Reform H.R. 3590 – the Patient Protection and Affordable Care Act (PPACA), signed into law on March 23, 2010.
2. compliance with California requirements that gender not be used as a rating factor effective January 1, 2011.

Specifically, this filing contains the following:

- Adjusted base premium rates for Comprehensive Medical Expense and Limited Medical Expense benefit plans filed with the State of California, reflecting the impact of HCR-mandated benefit changes and gender-neutral rating;
- Revised age factors, reflecting the implementation of gender-neutral rating; and
- Applicability of changes to all grandfathered and non-grandfathered business contracts, as defined by HCR, and generally defined as existing business contracts written with original effective dates prior to October 1, 2010.

With regards to the existing Individual Advantage benefit plans, these plans will continue to be available to existing members, but we will not be actively marketing these plans to new members. These policies provide comprehensive and limited medical expense benefits and apply a calendar year deductible of:

- $500 (MC 500 plan – version 070105);
- $1,500 (MC 1,500 plan – version 070105);
- $2,500 (MC 2,500 plan – version 070105);
- $5,000 (MC 5,000 plan – version 070105);

- $6,500 (MC 6,500 plan – version 07012010);

The above-listed plan designs comply with HCR changes mandated for applicability to grandfathered business contracts issued with original effective dates prior to March 23, 2010 and non-grandfathered business contracts issued with original effective dates of March 23, 2010 through September 30, 2010. It is our intent that the rates will become effective on January 1, 2011 for all existing business effective prior to January 1, 2010, and on upon renewal for plans issued between January 1, 2010 and September 30, 2010.

Benefit Changes

As applicable, the following is a list of benefit design changes applied to existing filed plans in order to adjust monthly premium rates for HCR-compliance:

- Elimination of the Preexisting Conditions Exclusion for Covered Persons less than 19 years of age.
- Elimination of Annual and Lifetime Dollar Limits on “Essential Services”, as defined by PPACA.
- Elimination of cost-sharing for specified Preventive Services.
- Extension of Dependent Coverage for Children up to Age 26 without dependency requirements such as being a full-time student, unmarried or solely dependent upon the parents for support.
- Requires plans that cover emergency services to provide such coverage without the need for prior authorization, regardless of the participating status of the provider, and at the in-network cost-sharing level.

With respect to the above changes, the expected value of the benefit changes applicable to each currently filed benefit plan marketed to individuals for effective dates prior to October 1, 2010 is shown in the table contained in the “Premium Rate

Development" section. Although HCR regulations allow for a subset of the above benefits to be applied to grandfathered contracts, we have decided to include all above benefit changes to both grandfathered and non-grandfathered contracts, except we will continue to apply pre-existing condition exclusions to grandfathered contracts.

Applicability

These policy forms are intended for grandfathered and non-grandfathered business with original effective dates prior to October 1, 2010.

Demographic Factors

Demographic factors are being revised to remove gender as a rating variable. We start with the existing age/gender factors by plan (or implied age/gender factors based on prior rate tables) and average the single factors by age. We adjust factors for ages 13-18 to produce a smoother premium curve. We then calculate required base-rate adjustments to result in an actuarially equivalent transition. Next, we normalize the demographic factor tables so that the factor for a single 37 year old is 1.00 and calculate the required base-rate adjustment as the appropriate demographic factor prior to the normalization (generally about 1.17) so that the rate determined for this cell with the new (1.00) demographic factor remains unchanged. We further make an adjustment to account for anticipated selection.

In order to account for the change in dependent eligibility to age 26 and the assumed increase in the average number of members enrolled on parent-child and family contracts in tier-rated existing business (issued prior to July 1, 2009), we further increase rates for these two tiers by 4.4% (as reflected in a revision to the age/tier factors).

Revised demographic factors are included in the attached Exhibit A. The factors vary by plan and original effective date.

Area Factors

The rating area definitions remain unchanged. As part of this filing, we will be using a factor-based approach to developing rate tables instead of applying adjustments to the previously filed rates. As such, we have developed area factors and plan-specific base rates that best replicate our existing rate tables. While changes to existing area factors are not intended, there likely are some differences between the area factors implied in previous rate tables and the factors we calculated. A complete description of rating area definitions and the corresponding area factors (based on original effective date) is included in the attached Exhibit B.

Experience

This rate filing pertains to the adjustment of monthly premium rates for purposes of HCR compliance for existing products sold to individuals with original effective dates prior to October 1, 2010, and to the adjustment of rates to a unisex basis. For purposes of premium rate level and medical claim trend, this filing relies on experience previously provided in the June 28, 2010 resubmissions of filings with State Tracking Numbers CA-2010-00028 and CA-2010-00354. For completeness, we include updated experience by area and by plan in the following tables.

Experience by area

Plan	Member Months	Incurred Claims	Earned Premium	Loss Ratio
Rating Area 1	179,636	26,370,985	31,905,267	82.7%
Rating Area 2	75,119	11,610,006	15,463,889	75.1%
Rating Area 3	46,997	5,526,484	9,059,378	61.0%

· *Totals include a small amount of membership for other/unknown plans.*

Premium Rate Development

Development of Factors Underlying Current Rate Tables
In order to simplify the calculation of revised rates, we first determine the age/gender and area factors and plan-specific base rates that provide the best match to the most recently filed rate tables for renewal business.

For business issued July 1, 2008 and later, age/gender factors are set to the last table filed that applies to each specific plan. For business issued prior to July 1, 2008, we calculate the age/gender factor table separately for each plan by taking the most

recently filed rate tables then 1) calculating the relativity between the male 35-39 year old single rate and each of the other cells for a given rating area and 2) taking a straight-average of the factor across rating areas.

We then determine area factors (setting the factor for area 5 equal to 1.0) for each block of business (issued prior to 7/1/08, issued 7/1/08 to 6/30/09, issued 7/1/09 to 6/30/10) and the corresponding rate for a 37 year old male in area 5 for each plan by starting with estimates of the original area factors adjusted for all filed revisions and identifying the factors that produce the best replication of the most recently filed rate tables.

All subsequent adjustments are based on these results.

Development of Proposed Rate Tables and Revision of Underlying Factors

We do not make further revisions to area factors. The age/gender factors are converted to unisex age factors as discussed above. Adjustments are made to the base rates in order to reflect changes resulting from revising and renormalizing the demographic factor tables.

The base rates are further adjusted to reflect benefit changes made to bring the plans into compliance with HCR – primarily resulting from changes to preventive care benefits and removal of maximums on pharmacy benefits.

The following table presents the plan-specific rate adjustments made to reflect the cost of the additional mandated HCR benefits. The adjustment factor is the sum of the impacts of removing preventive care cost sharing/limits, removing lifetime benefit maximums, and removing calendar year maximums on essential services. This adjustment factor is applied to the previously filed comparable existing benefit plan's prior base rate.

The HCR-adjusted base premium rate for each plan design then becomes the product of the following: 1) the Base Premium Rate for currently filed plans; 2) the Benefit Adjustment Factor, as shown above; and 3) adjustments made to account for the change to unisex rating, including the re-normalization of the demographic factor tables.

Monthly premium rates by plan for our standard risk classification are developed by calculating the product of the following: 1) the Base Premium Rate; 2) the applicable Demographic Factors, as provided in Exhibit A; and 3) the applicable Rating Area Factor, as shown in Exhibit B.

As previously filed, premium rates quoted to new business effective July 1, 2009 and later increase each quarter. These members (effective July 1, 2009 and later) receive increases effective on their policy anniversary date, and those rate changes will be the same multiplicative adjustments regardless of the member's original rate.

Due to the nature of this filing, members effective July 1, 2009 through December 31, 2009 will receive an off-anniversary premium adjustment. This premium adjustment will reflect the changes included in this filing but will not consist of any further rate action / rate level adjustment.

Resulting monthly premium rates are listed in the accompanying rate tables.

Based on our current mix of business, this will result in a 4.4% aggregate increase for the current block of business resulting from the following:

1. 1.3% to offset an average 1.3% increase in benefit richness
2. 2.4% to offset increased selection due to gender-neutral rating
3. 0.7% to offset increases in the number of members enrolled on Parent+Child(ren) or Family subscriber-rated contracts

Lifetime Loss Ratio

Please see attached Exhibit C for details on the lifetime loss ratio projections. We have modified the projection to incorporate a number of the recommendations from the Axene Health Partners report. Revisions include splitting the projection by deductible tier (no deductible, deductibles up to $2500, and deductibles in excess of $2500) and basing underwriting wear-off assumptions on a calculation using actual membership by duration month at May 31, 2010, and "80% of Milliman claims duration factors." All lifetime and future projected loss ratios exceed the 70% minimum requirement.

Proposed Effective Date

We are proposing an effective date of January 1, 2011.

Underwriting and Premium Classes

Policy forms are subject to medical underwriting. For grandfathered policies, this filing proposes no changes to the general underwriting guidelines or our currently filed premium classifications discussed in our most recent rate filing. For non-grandfathered policies, our underwriting guidelines have been changed such that no children under the age of 19 will be declined coverage as the result of pre-existing conditions. At this time, we are electing to waive the expected premium impact associated with this provision.

For business issued on and after July 1, 2009, premiums by plan are based on attained age and underwriting classification. We issue policies at eleven different underwriting levels.

The lowest underwriting level is our standard level, which has no rate-up. There will be ten additional underwriting levels comprised of rate-up factors ranging from 10% to 100%. Rate-up factors will be assigned in increments of 10% up to a rate-up of 100%. The final rate for the underwritten policy will be determined as the standard rate multiplied by (1 + rate-up-factor).

For business issued prior to July 1, 2009, we issued policies at three different underwriting classifications - Level A, Level B, and Level C. Level A members received coverage at our lowest rates. Level B and C members had health conditions that resulted in the collection of additional premium equal to 25% of Level A premium for Level B and 50% of Level A premium for Level C.

The underwriting classification is assigned at the time the policy is issued, and will not be changed by Aetna if a member's health deteriorates after purchasing coverage. However, if the member applies to change their benefits, we will consider the member's medical condition at the time of the change request. If their health status at the time of the request warrants a different underwriting classification, then the member can accept the new coverage at the different underwriting classification or remain in their current coverage at their current underwriting classification.

We have developed underwriting guidelines, which determine the appropriate underwriting classification to place prospective members. These underwriting guidelines are based on the anticipated additional cost that would be attributable to the member's known medical conditions. These additional costs are based upon the judgment of medical personnel of the likelihood and frequency of necessary treatment for the known medical conditions as well as the cost of that treatment.

Actuarial Certification

Aetna Life Insurance Company

I hereby certify that to the best of my knowledge and judgment, this rate filing is in compliance with the applicable laws and regulations of the state of California. I also assert that the benefits are reasonable in relation to the premiums, and that the calculations are based on my best estimate of the future experience. I further attest that all lifetime and future projected loss ratios exceed the 70% minimum requirement.

James Zheng, FSA, MAAA

1 Experience period 06/01/2009 to 05/31/2010 and paid through 07/31/2010 used for the development of premiums and claims.
2. Membership for future periods based on actual membership at 05/31/10 and projected monthly with 4.0% new sales assumed through 12/31/2010 and 0% thereafter. Lapse rate of approximately 3.5% monthly.
3. Earned premium in aggregate equals earned premium pmpm multiplied by member months.
4. Incurred claims in aggregate equals incurred claim pmpm multiplied by member months.
5. Earned premium pmpm. Aggregate proposed rate increase of 4.2% is assumed on 1/1/2011.
6. Assumed premium pmpm increases of 13.3% annually for 7/2011 - 6/2014 and 12.3% for 7/2014 and later.
7. Assumed incurred claims pmpm increase of 4.2% on 1/1/2011 due to benefit enhancements and member selection.
8. Assumed incurred claims pmpm trend of 12.3% annually.
9. Assumed incurred claims pmpm increase with claim selection assumption of 1.9% for 6/2010 – 12/2010 and 0% thereafter.
10. Assumed incurred claims pmpm increase with underwriting wear-off off of 5.3% for 6/10 – 12/10, 3.1% for 1/11 – 6/11, 6.4% for 7/11 – 6/12, 5.1% for 7/12 – 6/13, 2.8% for 7/13 – 6/14, -0.2% for 7/14 – 6/15, 0.7% for 7/15 – 6/16, and 0.4% for 7/16 – 6/17.
11. Annual interest rate of 5% used in present value calculations.
12. Incurred loss ratio equals incurred claims divided by earned premium.
13. Credibility adjustment based on average membership in the experience period.
