### California Large Group Annual Aggregate Rate Data Report Form

(File through SERFF as a PDF or excel. If you enter data on a Word version of this document, convert to PDF before submitting the form. SERFF will not accept Word documents.

Note "Large Group Annual Aggregate Rate Data Report" in the SERFF "Filing Description" field)

The aggregate rate information submission form should include the following:

- 1) Company Name (Health Plan)
- 2) Rate Activity 12-month ending date
- 3) Weighted Average Rate Increase, and Number Enrollees subject to rate change
- 4) Summary of Number and Percentage of Rate Changes in Reporting Year by Effective Month
- 5) Segment Type
- 6) Product Type
- 7) Products Sold with materially different benefits, cost share
- 8) Factors affecting the base rate
- 9) Overall Medical Trend (Plain-Language Form)
- 10) Projected Medical Trend (Plain-Language Form)
- 11) Per Member per Month Costs and Rate of Changes over last five years submit CA Large Group Historical Data Reporting Spreadsheet (Excel)
- 12) Changes in Enrollee Cost Sharing
- 13) Changes in Enrollee Benefits
- 14) Cost Containment and Quality Improvement Efforts
- 15) Number of products that incurred excise tax paid by the health plan
- 16) Covered Prescription Drugs- submit SB 17 Large Group Prescription Drug Cost Reporting Form (Excel)
- 17) Other Comments
- 1) Company Name:

Blue Shield of California Life & Health Insurance Company

- 2) This report summarizes rate activity for the 12 months ending reporting year 2022.1
- 3) Weighted average annual rate increase (unadjusted)<sup>2</sup>
  - All large group benefit designs <u>8.2</u>%
  - Most commonly sold large group benefit design <u>8.2</u>%

Weighted average annual rate increase (adjusted)<sup>3</sup>

• All large group benefit designs <u>5.0</u>%

Revised: June 11, 2019

<sup>&</sup>lt;sup>1</sup> Provide information for January 1-December 31 of the reporting year.

<sup>&</sup>lt;sup>2</sup> Average percent increase means the weighted average of the annual rate increases that were implemented (actual or a reasonable approximation when actual information is not available). The average shall be weighted by the number of enrollees/covered lives.

<sup>&</sup>lt;sup>3</sup> "Adjusted" means normalized for aggregate changes in benefits, cost sharing, provider network, geographic rating area, and average age.

- Most commonly sold large group benefit design<sup>4</sup> <u>5.0</u>%
- 4) Summary of Number and Percentage of Rate Changes in Reporting Year by Effective Month

<sup>&</sup>lt;sup>4</sup> Most commonly sold large group benefit design is determined at the product level. The most common large group benefit design, determined by number of enrollees should not include cost sharing, including, but not limited to, deductibles, copays, and coinsurance.

<sup>&</sup>lt;sup>5</sup> The total number of enrollees/covered lives (employee plus dependents) affected by, or subject to, the rate change.

<sup>&</sup>lt;sup>6</sup> Average percent increase means the weighted average of the annual rate increases that were offered (final rate quoted, including any underwriting adjustment) (actual or a reasonable approximation when actual information is not available). The average shall be weighted by the number of enrollees/covered lives in columns 4 & 5.

#### Place comments below:

(Include (1) a description (such as product name or benefit/cost-sharing description, and product type) of the most commonly sold benefit design, and (2) methodology used to determine any reasonable approximations used).

- 1) PPO is the most commonly sold benefit design.
- 2) For 2022 projected rate increases, we estimated the numbers based on business pricing decisions.
- 5) Segment type: Including whether the rate is community rated, in whole or in part

# See Health and Safety Code section 1385.045(c)(1)(B) and Insurance Code section 10181.45(c)(1)(B)

Comments: Describe differences between the products in each of the segment types listed in the above table, including which product types (PPO, EPO, HMO, POS, HDHP, other) are 100% community rated, which are 100% experience rated, and which are blended. Also include the distribution of covered lives among each product type and rating method.

For a PPO group with more than 250 subscribers, the experience is fully credible, and therefore, the group is 100% experience rated. For a PPO group with less than 100 subscribers, the group experience is deemed to have no credibility and is 100% manual rated. Groups fall in between have blended rating.

Distribution of covered lives among each product type and rating method:

| Product type | 100% Community/<br>manual Rated | Partial<br>Community/manual<br>Rated | 100% Experience<br>Rated |
|--------------|---------------------------------|--------------------------------------|--------------------------|
| PPO          | 100.0%                          | 100.0%                               |                          |
| EPO          | 0.0%                            | 0.0%                                 |                          |
| HMO          | 0.0%                            | 0.0%                                 |                          |

In the comment section below, provide the following:

- Number and description of standard plans (non-custom) offered, if any. Include a description of the type of benefits and cost sharing levels.
- Number of large groups with (i) custom plans and (ii) standard plans.

Place comments here:

| Number of standard PPO plans: 4 The most popular PPO plan is an Active Choice plan. For first tier professional services, BSC pays the first \$750 dollars and the rest will be paid by members until the OOPM. The second tier hospital services, members pay 20% par/50% non-par coinsurance%. |

8) Describe any factors affecting the base rate, and the actuarial basis for those factors, including all of the following:

# See Health and Safety Code section 1385.045(c)(2) and Insurance Code section 10181.45(c)(2)

| Factor  | Provide actuarial basis, change in factors, and member months during 12-month period.  |
|---|--|
| Geographic Region<br>(describe regions)   | This factor is designed to reflect the cost of health care differences caused by geographic locations. We routinely review the factors based on 12 months of experience. Overall book level impact is 0.   |
| Age, including age rating factors (describe definition, such as age bands)  | An age factor reflects the overall cost predictions based on members' demographic characteristics. We routinely review the factors based on 12 months of experience.   |
| Occupation  | We do not consider occupation in rating.   |
| Industry  | The industry factor reflects the cost of health care differentials attributed to the industry classification. We routinely review the factors based on 12 months of experience and available industry information. Where appropriate industry factors were shifted up or down by one classification resulting in at most a ±5% change in factor.   |
| Health Status Factors, including but not limited to experience and utilization  | Health status factors reflect member's overall health profile that is not captured by age and gender. We routinely review the factors based on 12 months of experience.  |
| Employee, and employee and dependents, <sup>7</sup> including a description of the family composition used in each premium tier                   | Tier factor reflects the family composition of the contract. The four tiers used in rating are employee only, employee and spouse, employee and children, and family. We routinely review the factors based on 12 months of experience.  |
| Enrollees' share of premiums  | We do not consider enrollee's share of premium in rating.  |
| Enrollees' cost sharing, including cost sharing for prescription drugs  | Plan factor reflects enrollee's cost sharing. We routinely review the factors based on 12 months of experience.  |
| Covered benefits in addition to basic health care services and any other benefits mandated under this article                                     | Additional benefits (including infertility services, substance abuse services, hearing aid, chiropractic, and acupuncture) are available as riders with additional PMPM costs. We routinely review the factors based on 12 months of experience.   |
| Which market segment, if any, is fully experience rated and which market segment, if any, is in part experience rated and in part community rated | For an HMO group with more than 500 subscribers or a PPO group with more than 250 subscribers, the experience is fully credible, and therefore, the group is 100% experience rated. For an HMO group with less than 250 subscribers or a PPO group with less than 100 subscribers, the group experience is deemed to have no credibility and is 100% manual rated. Groups fall in between have blended rating. |
| Any other factor (e.g. network changes) that affects the rate that is not otherwise specified   |  |

<sup>&</sup>lt;sup>7</sup> i.e. premium tier ratios

9) Overall large group medical allowed trend factor and trend factors by aggregate benefit category:

#### a) Overall Medical Allowed Trend Factor

"Overall" means the weighted average of trend factors used to determine rate increases included in this filing, weighting the factor for each aggregate benefit category by the amount of projected medical costs attributable to that category.

Allowed Trend: (Current Year) / (Current Year – 1)

#### b) Medical Allowed Trend Factor by Aggregate Benefit Category

The aggregate benefit categories are each of the following – hospital inpatient, hospital outpatient (including emergency room), physician and other professional services, prescription drugs from pharmacies, laboratory services (other than hospital inpatient), radiology services (other than hospital inpatient), other (describe).

# See Health and Safety Code section 1385.045(c)(3)(A) and Insurance Code section 10181.45(c)(3)(A)

| Hospital Inpatient <sup>8</sup>                                | -3.8% |
|--|-------|
| Hospital Outpatient (including ER)                             | 4.1%  |
| Physician/other professional services9                         | 5.1%  |
| Prescription Drug <sup>10</sup>                                | 10.2% |
| Laboratory (other than inpatient) 11                           | 1.6%  |
| Radiology (other than inpatient)                               | 1.6%  |
| Capitation (professional)                                      | 0.0%  |
| Capitation (institutional)                                     | 0.0%  |
| Capitation (other)   | 11.7% |
| Other (describe) - ambulance, DME, orthotics, prosthetics etc. | 1.6%  |

<sup>&</sup>lt;sup>8</sup> Measured as inpatient days, not by number of inpatient admissions.

<sup>&</sup>lt;sup>9</sup> Measured as visits.

<sup>&</sup>lt;sup>10</sup> Per prescription.

<sup>&</sup>lt;sup>11</sup> Laboratory and Radiology measured on a per-service basis.

| No professional or institutional capitation for PPO products, therefore no applicable trend<br>Capitation (other) is mental health services. | 1. |
|--|----|
| Other includes DME, Prosthetics, Ambulance, Hospice, Chiro, some Home Health.  |    |
|  |    |
|  |    |
|  |    |
|  |    |
|  |    |
|  |    |
|  |    |

Please provide an explanation if any of the categories under 9(b) are zero or have

### 10)Projected medical trend:

no value.

Use the same aggregate benefit categories used in item 9 – hospital inpatient, hospital outpatient (including emergency room), physician and other professional services, prescription drugs from pharmacies, laboratory services (other than hospital inpatient), radiology services (other than hospital inpatient), other (describe). Furthermore, within each aggregate category quantify the sources of trend, i.e. use of service, price inflation, and fees and risk.

See Health and Safety Code section 1385.045(c)(3)(B) and Insurance Code section 10181.45(c)(3)(B)

#### 14) Cost containment and quality improvement efforts

Describe any cost containment and quality improvement efforts since prior year for the same category of health benefit plan. To the extent possible, describe any significant new health care cost containment and quality improvement efforts and provide an estimate of potential savings together with an estimated cost or savings for the projection period. Companies are encouraged to structure their response with reference to the cost containment and quality improvement components of "Attachment 7 to Covered California 2017 Individual Market QHP Issuer Contract:"

- 1.01 Coordination and Cooperation
- 1.02 Ensuring Networks are Based on Value
- 1.03 Demonstrating Action on High Cost Providers
- 1.04 Demonstrating Action on High Cost Pharmaceuticals
- 1.05 Quality Improvement Strategy
- 1.06 Participation in Collaborative Quality Initiatives
- 1.07 Data Exchange with Providers
- 1.08 Data Aggregation across Health Plans

See Health and Safety Code section 1385.045(c)(3)(F) and Insurance Code section 10181.45(c)(3)(F), see also California Health Benefit Exchange, April 7, 2016 Board Meeting materials:
