PD1100 Appliance

CPU Model: IBM X206 w/2GB RAM
Processor: P4
Internal Storage: 4 simple-swap SATA drives, 3=250GB, 1=160GB
RAID Supported: Optional RAID 5 controller installed
Network Interface: - Integrated 10/100/1000 Ethernet
Operating System: Red Hat® Linux® Enterprise 3.0,
Cache: 1MB L2
Scalability: Supports up to 32 concurrent users
Supports 3-5 midrange scanners and batch scanning modules
Backup Support: CDI runs Galaxy iDataAgent software for Linux on the appliance to support backup to CDI's Commvault system.

ParaDocs Web Explorer Software

Development

Platform: PHP and Javascript

Indexing

Database Platform: PostgreSQL

Licensing: CDI is licensed for up to 32 concurrent users (a license for up to 128 users is available, but not supported on the PD1100 Appliance).

Accessibility: Accessible through a web browser from inside or outside the WAN (only security restrictions may affect outside access). Accessible through CDI's VPN for secured remote maintenance performed by the Contractor.

Repository: Appliance hard drive serves as data repository. However, repository can be distributed to other volumes.
