There were no changes to the PML Percentages this year. In 1998, there were revisions in the PML percentages for residential structures. These revisions are discussed on Page 2 of the Instructions.

We again emphasize the importance of primary carriers supplying the necessary information to their reinsurers, and reinsurers supplying it to their retrocessionaires, to assure complete reporting by zone. The results of this form may be seriously impaired without the consolidation of reinsurance data by zone. Your cooperation on this matter is essential to the success of the program. To help in this regard, a Form "X" is included which should be used for reporting to reinsurers.
