SCOPE OF EXAMINATION

We have performed our multi-state examination of the Company. The previous examination of the Company was as of December 31, 2018. This examination covered the period from January 1, 2019 through December 31, 2022.

The examination was conducted in accordance with the National Association of Insurance Commissioners *Financial Condition Examiners Handbook (Handbook)*. The Handbook requires the planning and performance of the examination to evaluate the Company's financial condition, assess corporate governance, identify current and prospective risks, and evaluate system controls and procedures used to mitigate those risks. An examination also includes identifying and evaluating significant risks that could cause an insurer's surplus to be materially misstated both currently and prospectively.

All accounts and activities of the Company were considered in accordance with the risk-focused examination process. This includes assessing significant estimates made by management and evaluating management's compliance with Statutory Accounting Principles. The examination does not attest to the fair presentation of the financial statements included herein. If an adjustment was identified during the course of the

examination, the impact of such adjustment would be documented separately following the Company's financial statements.

This examination report includes findings of fact and general information about the Company and its financial condition. There might be other items identified during the examination that, due to their nature (e.g., subjective conclusions, proprietary information, etc.), were not included within the examination report but separately communicated to other regulators and/or the Company.

This was a coordinated examination whereby California is the lead state of the GeoVera Holdings Inc. Group (the Group). The examination was conducted concurrently with GeoVera Insurance Company (California) and GeoVera Specialty Insurance Company (Delaware) in the GeoVera holding company system.
